

CARRIER TAPE TRAY

"Now a small lot of components can be mounted with Carrier Tape Tray!"

- ▶ Perfect for prototype assembly and SMD evaluation
- ▶ Designed for processing different width of emboss tapes simultaneously from a single tray setting. Quick width adjustable.

Model No.: NCAJ-5
 Outer Dimensions: 230(W) x 355(D) x 20(H)mm
 Tape guides: 5 per tray
 (additional trays are optional)
 Component height: Maximum 10mm
 Optional: Pin

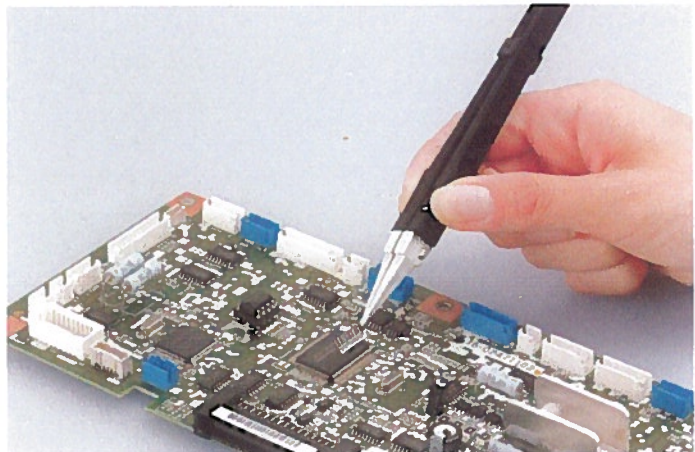

ESD SAFE & CLEAN ROOM COMPATIBLE TWEEZERS

ESD safe and clean room compatible tweezers.

- ▶ Tweezer tips are made of NIX's original material(NIXAM® 240).
- ▶ Our tweezers are gentle on objects, friction-free, and lightweight.
- ▶ Tweezer pressure adjustable for easy pick up.
- ▶ Safe to use in a clean room. Comes in a clean room safe packaging.

Tweezer accuracy
 vertically: ± 0.1 mm(up and down)
 horizontally: ± 0.2 mm(right and left)

STATINIX LABEL™

ESD safe label protects the important electronic parts during the SMT assembly process.

- ▶ Special adhesive discharges electrostatic. This product continuously dissipates electrical charges before it builds up on the label below 24V.
- ▶ SMT Re-flow oven heat-resistant up to 260°C/5minutes.
- ▶ Good luster and gloss, resulting in clear print quality.
 (Recommendation ribbon:DK620)
- ▶ Thickness 0.094mm
